

ISO 9001- 2008, EN 14001 Registration Announcement

Dear Colleague:

Smart Sand is proud to announce its successful ISO 9001-2008 Quality Management System Registration along with EN 14001-2004 Environmental Management System, effective April 27, 2016.

Smart Sand has invested more than a year preparing for these registrations. This process required examining and documenting all of our industrial processes, and making sure through internal audits that processes are predictable and consistent.

Smart Sand was audited by DQS of Buffalo Grove, IL. Our motivation to obtain these registrations was driven by a desire to meet customer needs and to increase customer satisfaction. We believe that these registrations will be increasingly important in the industries we serve.

For your records, Smart Sand's Registration numbers and scope are as follows:

Standard: ISO 9001-2008

Certificate Number: 10014264 QM08

Scope: The quality management system associated with the dry processing of industrial sand and proppant, and the mining of sand, to specifications agreed upon with customers.

Standard: EN 14001-2004

Certificate Number: 10014264 UM

Scope: The environmental activity and supporting processes associated with the dry processing of industrial sand and proppant, and the mining of sand.

Thank you for your help and support in this process. If you have any questions, please don't hesitate to contact me.

Best Regards,

Tom Young
